RE: Blue Jay Construction Ltd

Blue Jay Construction carried out the refurbishment of some of the toilets in our school during February and March 2005. This involved the refurbishment into adult and disabled toileting facilities of some of our existing toilets. Our property consultants, DHP of Weybridge, directed the work.

The work was carried out during school time. However, Blue Jay ensured that there was minimum disruption to the working life of the school. In particular all workmen were briefed regarding any interaction with children, which might take place, and there were no problems in this regard. The school was not put to any major disruption during the works period due to very effective screening of the work and fencing off of the works compound.

The quality of the work is very good and exactly as per the tender. The communication between Blue Jay and the school was also excellent and this all contributed to the smooth running of the project.

Therefore, I am very happy to recommend Blue Jay Construction on this basis.

A handwritten signature in black ink, appearing to read 'Rory McCormack', is written over a thin vertical line that extends downwards from the signature area.
